

ERRATUM

RE: "POOLED ANALYSIS AND META-ANALYSIS OF GLUTATHIONE S-TRANSFERASE M1 AND BLADDER CANCER: A HuGE REVIEW"

American Journal of Epidemiology 2002;156:95–109

In the paper by Engel et al. (1) published in the July 15, 2002, issue of the *Journal*, several errors were introduced during production. While the errors were corrected in the online version of the paper, they were accidentally included in the printed version.

On page 96, the fifth sentence of the second paragraph should read as follows: "The other two (*GSTM1a* and *GSTM1b*) differ by a C→G substitution at base position 534, resulting in a Lys→Asn substitution at amino acid 172 (2)." On page 104, the references to interaction should refer to the effect of interaction between *GSTM1* and smoking on bladder cancer risk. On page 109, the beginning of the first

bulleted item should read "Odds ratios ranging from 2.5 to 3.5 for bladder cancer, using population-based controls, from ever smoking among *GSTM1* active persons..." The beginning of the second bulleted item on page 109 should read "Odds ratios ranging from 1.45 to 2.02 for study controls from ever smoking among *GSTM1* active persons..."

The *Journal* apologizes for these errors.
